

WEBPACK 5 – WHAT'S NEW

TOBIAS KOPPERS

TWITTER: @WSOKRA

GITHUB: @SOKRA

ORGANIZATION

- WEBPACK 5 → WEBPACK CORE (webpack/webpack) MAJOR VERSION 5
- OTHER REPOS DEVELOP INDIVIDUALLY → SEPARATE MAJOR VERSIONS
- DEVELOPMENT ON `webpack/webpack#next`
- ~1K COMMITS COMPARED TO MASTER
- ~500 PRS MERGED

CATEGORIES

- HOTNESS/BENEFIT: 
- RISK OF BREAKING: 
- RISK OF BUGS: 

NODE POLYFILLS

```
require("crypto");  
import crypto from "crypto";
```

WEBPACK 4

- COMPILED SUCCESSFUL
- CRYPTO POLYFILL 301KB
- LIMITED FEATURES
- OUTDATED
- INSTALLED WITH WEBPACK

WEBPACK 5

- "CRYPTO" CANNOT BE RESOLVED

```
yarn add crypto-browserify  
resolve: { alias: {  
  crypto: "crypto-browserify"  
} }
```

DETERMINISTIC MODULE/CHUNK IDS

WEBPACK 4 (PRODUCTION+)

- 1.1A2B3C.BUNDLE.JS
 - [1] ENTRY.JS
 - [2] LOGIN.JS
- 2.4A5B6C.BUNDLE.JS
 - [3] BUTTON.JS

- 1.3A2B1C.BUNDLE.JS
 - [1] ENTRY.JS
 - [2] LOGIN.JS
- 2.7A8B9C.BUNDLE.JS
 - [3] LOGIN-HELPER.JS
- 3.6A5B4C.BUNDLE.JS
 - [4] BUTTON.JS

WEBPACK 5 (PRODUCTION)

- 426.1A2B3C.BUNDLE.JS
 - [293] ENTRY.JS
 - [953] LOGIN.JS
- 853.4A5B6C.BUNDLE.JS
 - [832] BUTTON.JS

- 426.3A2B1C.BUNDLE.JS
 - [293] ENTRY.JS
 - [953] LOGIN.JS
- 157.7A8B9C.BUNDLE.JS
 - [533] LOGIN-HELPER.JS
- 853.4A5B6C.BUNDLE.JS
 - [832] BUTTON.JS

NAMED CHUNK IDS

WEBPACK 4 (DEVELOPMENT)

- MAIN.BUNDLE.JS
 - [./ENTRY.JS]
 - [./LOGIN.JS]
- 2.BUNDLE.JS
 - [./LOGIN-HELPER.JS]
- 3.BUNDLE.JS
 - [./BUTTON.JS]

WEBPACK 5 (DEVELOPMENT)

- MAIN.BUNDLE.JS
 - [./ENTRY.JS]
 - [./LOGIN.JS]
- LOGIN-HELPER_JS.BUNDLE.JS
 - [./LOGIN-HELPER.JS]
- BUTTON_JS.BUNDLE.JS
 - [./BUTTON.JS]

NEW IDS

	Source	[id].js (dev)	[id].js (prod)	[name].js
webpack 4	<code>import("./module");</code>	<code>1.js</code>	<code>1.js</code>	<code>1.js</code>
	<code>import(/* webpackChunkName: "something" */ "./module");</code>	<code>1.js</code>	<code>1.js</code>	<code>something.js</code>
webpack 5	<code>import("./module");</code>	<code>src_module_js.js</code>	<code>452.js</code>	<code>452.js</code>
	<code>import(/* webpackChunkName: "something" */ "./module");</code>	<code>something.js</code>	<code>853.js</code>	<code>something.js</code>

DETERMINISTIC EXPORT MANGLING

```
export { a_used, b_unused, c_used }
```

```
import { c_used } from "module"; console.log(c_used);
```

WEBPACK 4

- export { a_used as a,
/* b_unused, */ c_used as b }
- export { a_used as a,
b_unused as b, c_used as c }
- console.log(__WEBPACK_MODULE_M.b);
- console.log(__WEBPACK_MODULE_M.c);

WEBPACK 5

- export { a_used as d,
/* b_unused, */ c_used as u }
- export { a_used as d,
b_unused as w, c_used as u }
- console.log(__WEBPACK_MODULE_M.u);
- console.log(__WEBPACK_MODULE_M.u);

JS-LESS CHUNKS

```
splitChunks: { cacheGroups: { styles: {  
  moduleType: "stylesheet"  
} } }
```

WEBPACK 4

- STYLES.CSS 200KB
- STYLES.JS 10BYTES

WEBPACK 5

- STYLES.CSS 200KB

SOURCE TYPES

WEBPACK 4

[2] 2.bundle.js 135kb

```
splitChunks: {  
  minSize: 10_000,  
  maxSize: 100_000  
}
```

WEBPACK 5

[324] 324.bundle.js 135kb
14kb javascript 1.2kb runtime 20kb
webassembly 100kb stylesheet

```
splitChunks: {  
  minSize: {  
    javascript: 10_000,  
    webassembly: 5000,  
    stylesheet: 20_000  
  },  
  maxSize: {  
    javascript: 100_000,  
    webassembly: 50_000,  
    stylesheet: 200_000  
  }  
}
```

DEPENDENT CHUNKS

```
target: "node", // same for webworker, async-node
```

```
splitChunks: {  
  chunks: "all"  
}
```

WEBPACK 4

undefined is not a function

WEBPACK 5

- ENTRY CHUNK LOADS ALL DEPENDEND CHUNKS

MINIMUM NODE.JS VERSION

WEBPACK 4

```
“engines”: {  
  “node”: “>=6.11.5”  
}
```

WEBPACK 5

```
“engines”: {  
  “node”: “>=8.9.0”  
}
```

OBJECT SPREAD { ...OBJ }

ASYNC FUNCTIONS

(UN)SAFE CACHING

- RENAME `module.js` → `module.ts`

WEBPACK 4

Error: ENOENT: module.js not found

- ✗ RESTART WEBPACK
- `module.unsafeCache: true`
- `resolve.unsafeCache: true`

WEBPACK 5

- `module.unsafeCache: /node_modules/`
- ~~`resolve.unsafeCache`~~
- `resolve.cache: true`

IMPROVED WATCHING

- extensions: [".ts", ".js"]
- module.js
- ADD module.ts

WEBPACK 4

- ✘ NO CHANGE DETECTED

WEBPACK 5

- ✔ CHANGE DETECTED

SPLIT CHUNKS – MIN REMAINING SIZE

```
import(/* webpackChunkName: "chunk" */ "./module");
```

```
// module.js  
import "react";
```

WEBPACK 4

- CHUNK.JS 1KB
- VENDORS-CHUNK.JS 40KB

WEBPACK 5

- CHUNK.JS 41KB

```
splitChunks: {  
  minRemainingSize: 10_000  
}
```

MAX SIZE FOR INITIAL AND ASYNC

WEBPACK 4

```
splitChunks: {  
  maxSize: 100_000  
}
```

WEBPACK 5

```
splitChunks: {  
  maxInitialSize: 100_000,  
  maxAsyncSize: 50_000  
}
```

I. E. ONLY `maxAsyncSize` WHEN
INFRASTRUCTURE ISN'T READY FOR INITIAL SPLITTING

SPLIT CHUNKS – NAME

- `entry: { primary: "./primary", secondary: "./secondary" }`
- `splitChunks: { chunks: "all" }`

WEBPACK 4

- PRIMARY.JS
- SECONDARY.JS
- PRIMARY~SECONDARY.JS

- ADDING `tertiary` ENTRY:
`PRIMARY~SECONDARY~TERTIARY.JS`

WEBPACK 5

- PRIMARY.JS
- SECONDARY.JS
- `NODE_MODULES_SHARED_INDEX_JS.JS`

MERGING RESOLVE AND PARSER OPTIONS

```
resolve: {  
  alias: {  
    a: "..."  
  }  
}
```

```
module: {  
  rules: [{  
    resolve: {  
      alias: {  
        b: "..."  
      }  
    }  
  }  
}
```

WEBPACK 4

```
alias: {  
  b: "..."  
}
```

WEBPACK 5

```
alias: {  
  a: "...",  
  b: "..."  
}
```

PLACEHOLDER RENAME

WEBPACK 4

filename: “[hash].js”
HASH OF THE WHOLE APPLICATION
(LOOKS INNOCENT, BUT IS BAD)

filename: “[contenthash].js”
HASH OF THE FILE

WEBPACK 5

filename: “[fullhash].js”
HASH OF THE WHOLE APPLICATION
(CLEAR)

filename: “[contenthash].js”
HASH OF THE FILE

filename: “[hash].js”
ERROR WITH MIGRATION INFO

FUTURE-PROOF OPTIONS

WEBPACK 4

```
externals:  
  (context, request, callback) => {}
```

```
new IgnorePlugin(  
  /some-regexp/  
)
```

```
new BannerPlugin(  
  "Some banner"  
)
```

WEBPACK 5

```
externals:  
  ({ context, request }, callback) => {}
```

```
new IgnorePlugin({  
  resourceRegExp: /some-regexp/  
})
```

```
new BannerPlugin({  
  banner: "Some banner"  
})
```

PERSISTENT CACHING

WEBPACK 4

- `cache: true`
IN-MEMORY CACHING

- RESTARTING WEBPACK TAKES TIME

WEBPACK 5

- `cache: { type: "memory" }`
IN-MEMORY CACHING
- `cache: { type: "filesystem" }`
PERSISTENT CACHING

- EXPERIMENTAL PERSISTENT CACHING CAN BE ENABLED

- RESTARTING WEBPACK TAKES LESS TIME

CACHE OPTIONS

```
cache: {  
  type: "filesystem",  
  cacheDirectory: `node_modules/.cache/webpack`,  
  name: `${name}-${mode}`,  
  version: "",  
  cacheLocation: `${cache.cacheDirectory}/${cache.name}`  
  hashAlgorithm: "md4",  
  store: "pack", // "pack" | "idle" | "background" | "instant"  
  idleTimeout: 10_000, // 10s  
  idleTimeoutForInitialStore: 0,  
  loglevel: false // "debug" | "verbose" | "info" | "warning"  
}
```

CACHE OPTIONS (TODO)

```
cache: {  
  configDependencies: [  
    "./webpack.config.js",  
    "webpack-merge",  
    "./src/schema.gql"  
  ],  
  buildDependencies: [  
    "graphql-schema-compiler",  
    "html-webpack-plugin",  
    // loaders will be added automatically  
  ]  
}
```

- CACHE RELATIVE TO CONTEXT

STATS PRESET

WEBPACK 4

```
stats: "verbose"
```

WEBPACK 5

```
stats: {  
  preset: "verbose",  
  modules: false  
}
```

NEW STATS OPTIONS

WEBPACK 4

```
stats: {  
  chunkModules: true  
}
```

WEBPACK 5

```
stats: {  
  chunkRootModules: true,  
  SHOW ONLY THE ROOT MODULES  
  chunkModules: false,  
  SHOW ALL MODULES (NOW FALSE BY DEFAULT)  
  orphanModules: false,  
  HIDE NOT-INCLUDED MODULES  
  runtime: false,  
  HIDE RUNTIME MODULES  
  chunkRelations: false  
  SHOW PARENT/CHILDREN/SIBLING CHUNKS  
}
```

PLUGINS FOR STATS

WEBPACK 4

✗ NO PLUGINS, LIMITED CUSTOMIZING

WEBPACK 5

✓ HOOKS FOR **PLUGINS**

- NEW PRESETS
- MORE INFO IN JSON
- MORE INFO IN TEXT FORMAT
- DIFFERENT TEXT FORMAT

FILENAME FOR INITIAL CHUNKS

```
output: {  
  filename: "[id].bundle.js",  
  chunkFilename: "[id].chunk.js"  
}
```

WEBPACK 4

- RUNTIME.BUNDLE.JS
- PRIMARY.CHUNK.JS
- VENDORS~PRIMARY.CHUNK.JS
- SECONDARY.CHUNK.JS
- PRIMARY-SECONDARY.CHUNK.JS
- ON-DEMAND.CHUNK.JS
- VENDORS~ON-DEMAND.CHUNK.JS

WEBPACK 5

- RUNTIME.BUNDLE.JS
- PRIMARY.BUNDLE.JS
- VENDORS-PRIMARY.BUNDLE.JS
- SECONDARY.BUNDLE.JS
- SHARED.BUNDLE.JS
- ON-DEMAND.CHUNK.JS
- VENDORS-ON-DEMAND.CHUNK.JS

EXTENDED EXPORTS INFO

```
exports { a, b, c }
```

WEBPACK 4

- `providedExports`: [“a”, “b”, “c”]
- `usedExports`: [“a”, “c”]

WEBPACK 5

```
ExportsInfo: {  
  exports: Map {  
    a: {  
      provided: true,  
      used: UsageState.Used,  
      canMangle: true,  
      mangledName: “a”,  
      ...  
    },  
    ...  
  }  
}
```

BETTER TREE SHAKING

```
X.JS: exports { a, b, c };
```

```
Y.JS: import * as x from "./x"; exports { x };
```

```
Z.JS: import * as y from "./y"; console.log(y.x.b);
```

WEBPACK 4

```
Y.JS usedExports: ["x"]
```

```
X.JS usedExports: true
```

USED IN UNKNOWN WAY

ALL EXPORTS MAY BE NEEDED

NO MANGLING

✗ EXPORTS A, B AND C INCLUDED IN BUNDLE

WEBPACK 5

```
Y.JS x: {  
  used: OnlyPropertiesUsed  
}
```

```
X.JS a: { used: Unused }  
      b: { used: Used }
```

✓ EXPORTS A AND C OMITTED FROM BUNDLE

RUNTIME HELPER CODE

```
import thing from "./commonjs"

var _commonjs__WP_MODULE_0__ = __webpack_require__(123);
var _commonjs__WP_MODULE_0__default =
  /*#__PURE__*/ __webpack_require__._n(_commonjs__WP_MODULE_0__);

__webpack_require__._n(exports)
GETS DEFAULT EXPORTS FROM NON-ESM
```

WEBPACK 4

- CODE FOR `__webpack_require__._n` IS ALWAYS IN THE RUNTIME CODE
- MAYBE UNNEEDED RUNTIME CODE IN THE BUNDLE

WEBPACK 5

- `DependencyTemplates` TELL `RuntimeRequirements`
- `Compilation` AGGREGATES `RuntimeRequirements`
- `RuntimePlugin` ADDS `RuntimeModules` DEPENDING ON `RuntimeRequirements`
- `runtimeModules` ADD HELPER CODE
- ONLY RUNTIME CODE THAT'S NEEDED

SERIALIZATION

WEBPACK 4

- NO SERIALIZATION CODE

WEBPACK 5

```
serialize({ write }) {  
    write(this.flag);  
    write(this.value);  
}  
  
deserialize({ read }) {  
    this.flag = read();  
    this.value = read();  
}
```

PLUGINS:

CACHE INTERFACE

WEBPACK 4

```
compilation.cache = {}
```

WEBPACK 5

```
compilation.cache = new Cache();  
class Cache {  
  store(identifier, etag, data, callback)  
  get(identifier, etag, callback)  
  
  ...  
  
  hooks: {  
    get, store,  
    beginIdle, endIdle,  
    shutdown  
  }  
}
```

PLUGIN SYSTEM

WEBPACK 4

- TAPABLE 1
- AWESOME
BUT SOME FEATURES WERE
UNNEEDED AND COMPLEX

WEBPACK 5

- TAPABLE 2
- TYPESCRIPT TYPINGS
- DEPRECATED
 - CONTEXT
 - TAPABLE BASE CLASS
 - HOOKMAP.TAP

ARRAY TO SETS

WEBPACK 4

- `Compilation.modules: Module[]`
- `Compilation.chunks: Chunk[]`
- `Chunk.files: string[]`

WEBPACK 5

- `Compilation.modules: Set<Module>`
- `Compilation.chunks: Set<Chunk>`
- `Chunk.files: Set<string>`
- COMPAT-LAYER MAKES THESE Sets ACCEPT MOST ARRAY METHODS TOO

FILE SYSTEM INFO

- MODULES NEED TO CHECK IF CACHED SOURCE IS STILL VALID
- THEY COMPARE TIMESTAMPS OF ALL DEPENDENCIES

WEBPACK 4

- WATCHER TRACKS TIMESTAMPS
- TIMESTAMPS OBJECT IS PASSED TO COMPILATION
- MODULE READ TIMESTAMP FROM OBJECT
- MISSING TIMESTAMP INVALIDATES CACHE

WEBPACK 5

- WATCHER TRACKS TIMESTAMPS
- TIMESTAMPS ARE PASSED TO **FILESYSTEMINFO**
- MODULE READ TIMESTAMP FROM **FILESYSTEMINFO** CLASS
- MISSING TIMESTAMP IS **READ FROM FILESYSTEM**
- TIMESTAMPS FROM WATCHER ARE OPTIONAL

HOT MODULE REPLACEMENT

WEBPACK 4

- HOTMODULEREPLACEMENT ONLY FOR JS
- HMR IS NOT EXTENSIBLE BY PLUGINS

WEBPACK 5

- HMR IS **EXTENSIBLE** BY PLUGINS
- HMR IS POSSIBLE FOR **OTHER SOURCE TYPES**
- WE WILL ADD HMR SUPPORT FOR DEFAULT SOURCE TYPES (**WEBASSEMBLY, RUNTIME**)
- AND FOR MINI-CSS-WEBPACK-PLUGIN (SOURCE TYPE: **STYLESHEET**)

ASYNC QUEUES

parallelism: 100

WEBPACK 4

- ASYNC FOR EACH AND CALLBACKS TO PROCESS THE MODULE GRAPH
- SEMAPHORE TO CONTROL PARALLELISM

WEBPACK 5

- ASYNC **QUEUES** FOR ALL WORKLOADS
- OBSERVABLE BY **PLUGINS**
- PARALLELISM OPTION

MODULE GRAPH

WEBPACK 4

- `Module.dependencies: Dependency[]`
 - `Dependency.module: Module`
- GRAPH

WEBPACK 5

- `Module.dependencies: Dependency[]`
- ~~`Dependency.module`~~
- `ModuleGraph.getModule(dependency)`

EXPERIMENTS

WEBPACK 4

- EXPERIMENTAL .MJS SUPPORT ENABLED (DEPRECATED BY NODE.JS)
- EXPERIMENTAL .WASM SUPPORT ENABLED (OLD SPEC)

WEBPACK 5

- EXPERIMENTAL FEATURES DISABLED BY DEFAULT

```
experiments: {  
  mjs: true,  
  syncWasm: true,  
  asyncWasm: true,  
  topLevelAwait: true,  
  importAsync: true,  
  importAwait: true  
}
```

INJECTED MODULES

- USING `module` INJECTS A REFERENCE TO `webpack/builtin/module.js`
- USING THE `ProvidePlugin` INJECTS A REFERENCE SOME PROVIDED MODULE

WEBPACK 4

- `DependenciesBlockVariables`
- ADDS `var variable = expression;`
- DEDUPLICATED
- PREVENTS MODULE CONCATENATION

WEBPACK 5

- `InitFragments`
- ADDS CODE FRAGMENT BEFORE SOURCE CODE
- DEDUPLICATED
- **ALLOWS** MODULE CONCATENATION

WATCHING DEPENDENCIES

WEBPACK 4

- WEBPACK
 - WATCHPACK
 - CHOKIDAR
 - FSEVENTS (NATIVE DEPENDENCY)

WEBPACK 5

- WEBPACK
 - WATCHPACK

OWN WATCHING SOLUTION

INSTALL SIZE

WEBPACK 4

- WEBPACK: 1.33MB
- NODE_MODULES: 19.6MB

WEBPACK 5

- WEBPACK: 1.81MB
- NODE_MODULES: 13.0MB (-34%)

INSTALL

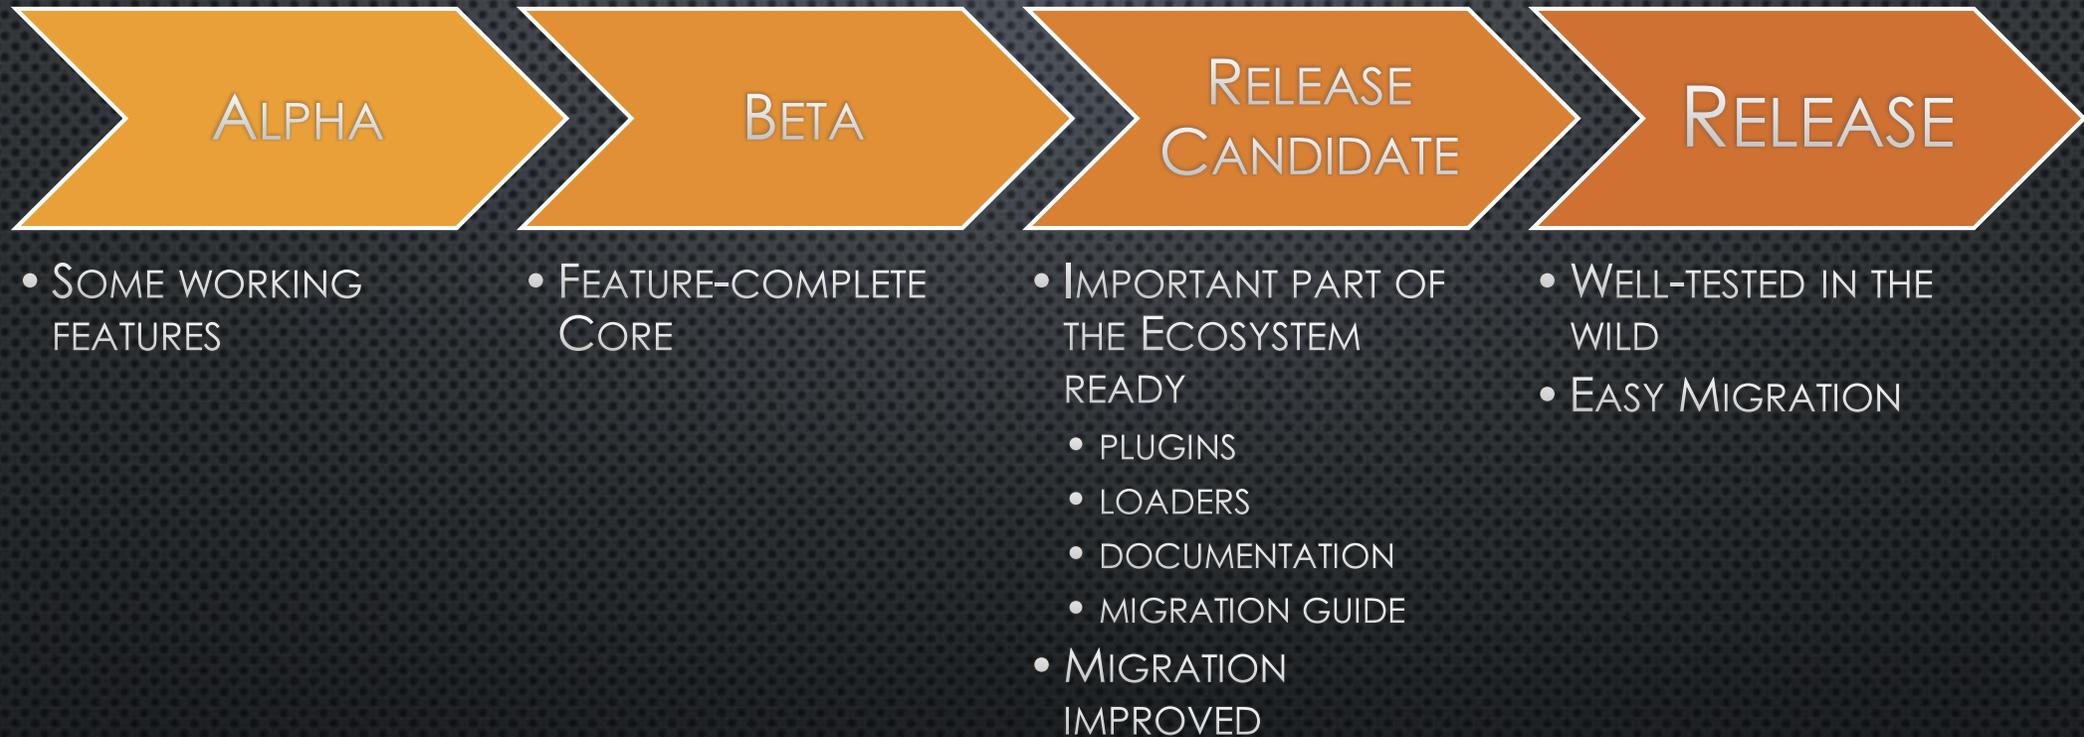

WEBPACK 4

- `yarn add --dev webpack`
- `npm i -D webpack`

WEBPACK 5

- `yarn add --dev webpack@next`
- `npm i --D webpack@next`
- THERE MIGHT BE BUGS
- IT MIGHT BE NOT WORKING AS DESCRIBED HERE
- WE MAY CHANGE BEHAVIOR

ROADMAP WEBPACK 5
