# THE PAST

PROBLEMS BUNDLER SOLVE

A SHORT WEBPACK HISTORY LESSON

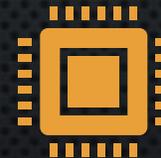

# PROBLEMS BUNDLERS SOLVE

- SCRIPT TAGS `<script>`
  - GLOBAL SCOPE
  - IIFE `!function() { ... }();`
- MODULE FORMATS
  - **AMD** (RUNTIME, BOILERPLATE, MANY REQUESTS)
  - **COMMONJS** (SYNC DEPENDENCIES)
  - **UMD** (AMD + COMMONJS + GLOBAL)
  - **ECMAScript MODULES** (MANY REQUESTS)
  - COMBINING THOSE `⬆`, OPTIMIZING

```
define(["dep"],  
function(dep) { ... });  
  
const dep = require("dep");  
module.exports = ...;  
  
import dep from "dep";  
export { ... }
```

# PROBLEMS BUNDLERS SOLVE

- NO SHARED DEPENDENCIES GRAPH
  - DISCONNECT BETWEEN JS, CSS, OTHER ASSETS
  - CONTENT HASHING, INLINING
- CONCATENATING ALL JS/CSS IS UNSUITABLE FOR LARGE APPLICATION
  - INITIAL LOAD TIME IS IMPORTANT
- SAVE → BUILD → RELOAD WORKFLOW IS SLOW
- USING NEW TECHNOLOGIES IN OLD BROWSER (E. G. ECMASCRIPT MODULES)
- HIDING SOURCE CODE STRUCTURE

# PROBLEMS WEBPACK SOLVES

- ASSUMPTION: EVERY BUILD IS DIFFERENT
- CUSTOMIZING/EXTENDING YOUR BUILD
  - MANY CONFIGURATION OPTIONS
- EXTENDING YOUR BUILD
  - LARGE PLUGIN INTERFACE
  - RICH PLUGIN ECOSYSTEM

# 2012

- FEB 2012
  - PROPOSED CODE SPLITTING TO MEDIKOO/MODULES-WEBMAKE
  - IMPLEMENTED POC BUNDLER WITH CODE SPLITTING
- NEW OPEN SOURCE PROJECT SOKRA/MODULES-WEBPACK
  
- SOME EARLY USES
- LOT OF FEEDBACK, IMPROVEMENTS

# 2013

- OCT 2013
  - [INSTAGRAM.COM EVALUATING WEBPACK AS BUNDLER](#)
- DEC 2013
  - BETA VERSION OF WEBPACK 1

# 2014

- JULY 2014

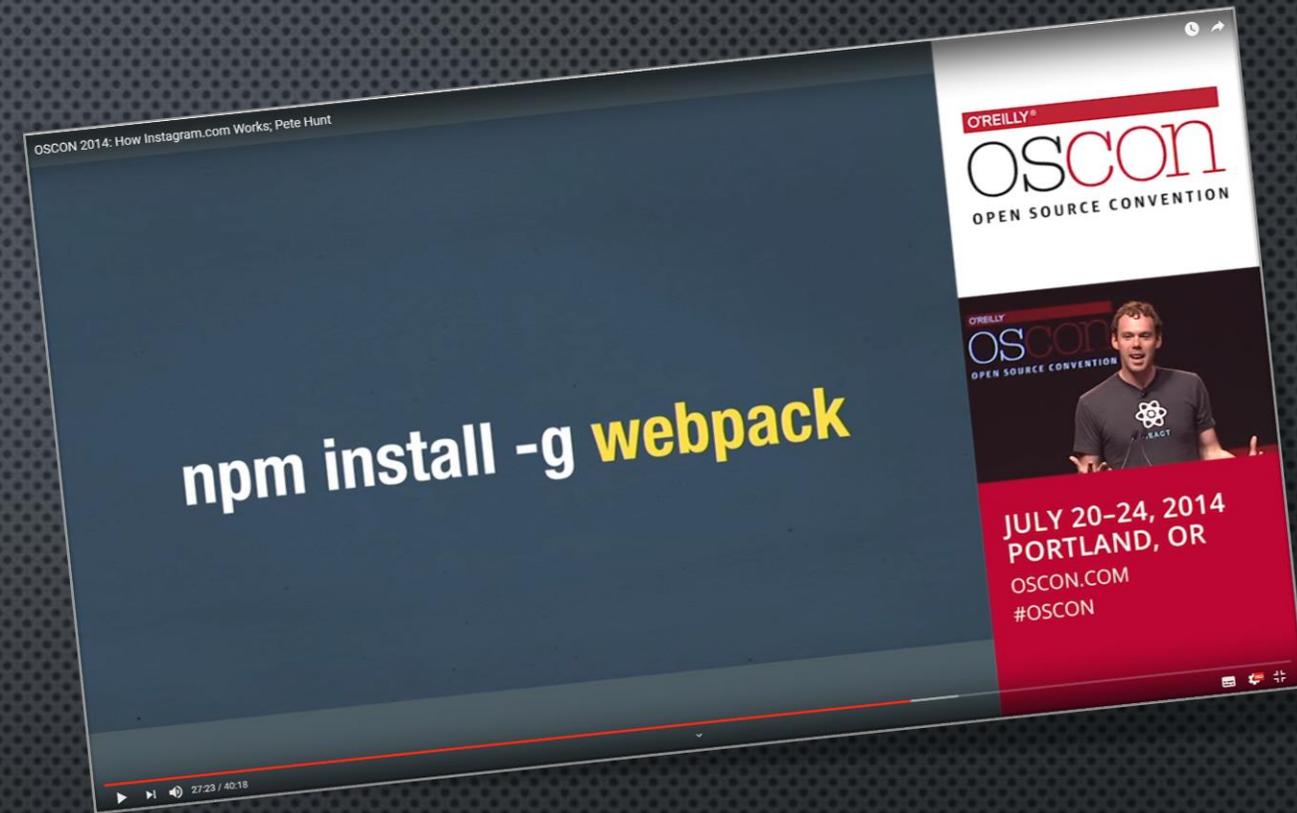

- PETE HUNT (INSTAGRAM.COM)  
OSCON TALK ABOUT THEIR BUILD STACK

- PROMOTING WEBPACK

- <https://www.youtube.com/watch?v=VktCL6Nqm6Y>

- FEB 2014

- WEBPACK 1 RELEASED

# 2015

- Nov 2015
  - BETA VERSION OF WEBPACK 2
  - NEW DOCUMENTATION BY ITS OWN TEAM
    - <https://github.com/webpack/webpack.js.org>
  - TREE SHAKING

2016

- JUN 2016
  - SEAN ORGANIZED US IN A CORE TEAM
- OCT 2016
  - JOINED JS FOUNDATION (LATER RENAMED TO OPENJS FOUNDATION)
  - JOINED OPEN COLLECTIVE

2017

# webpack

- JAN 2017
  - SPLIT WEBPACK AND WEBPACK-CONTRIB ORGANIZATIONS
  - WEBPACK 2 RELEASED (2 YEARS + 11 MONTHS AFTER WEBPACK 1)
  - NEW LOGO
- APR 2017
  - I WENT FULL-TIME WEBPACK

SPONSOR WEBPACK:  
<https://opencollective.com/webpack>

SPONSOR ME:  
<https://github.com/sponsors/sokra>

2017

# trivago

- JUN 2017
  - WEBPACK 3 RELEASED (5 MONTHS AFTER WEBPACK 2)
  - EXPERIMENTAL SCOPE HOISTING
- AUG 2017
  - TRIVAGO STARTED SPONSORING WITH \$10K/MONTH

# 2018

- FEB 2018
  - WEBPACK 4 RELEASED (6 MONTHS AFTER WEBPACK 3)
- DEC 2018
  - ALPHA VERSION OF WEBPACK 5

# 2019

- OCT 2019

- BETA VERSION OF WEBPACK 5

- NOW

- 1 YEAR + 9 MONTHS INTO WEBPACK 4
- WEBPACK 5 ON THE HORIZONT

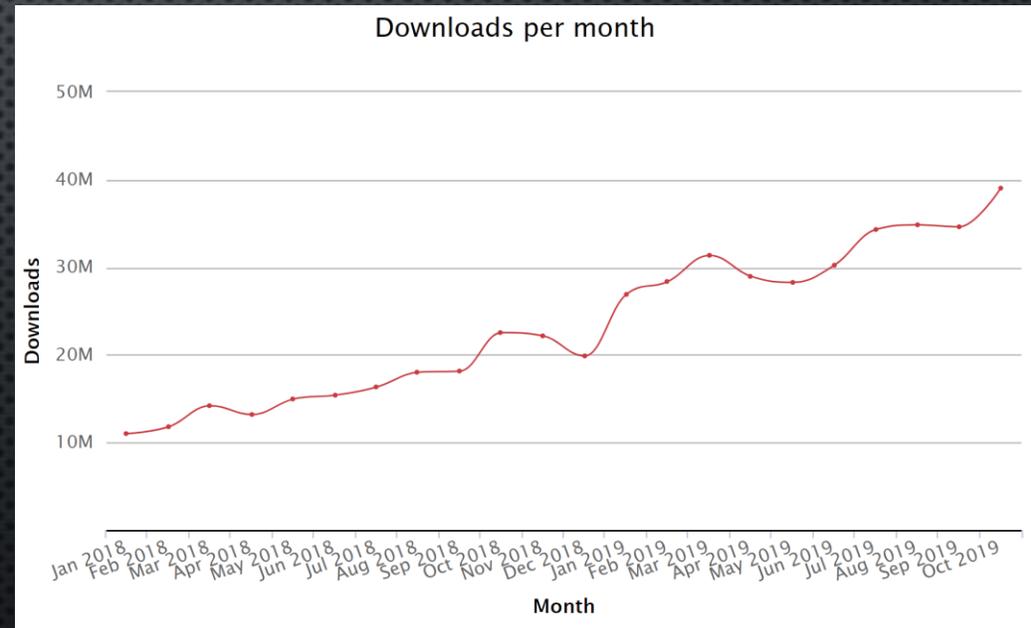

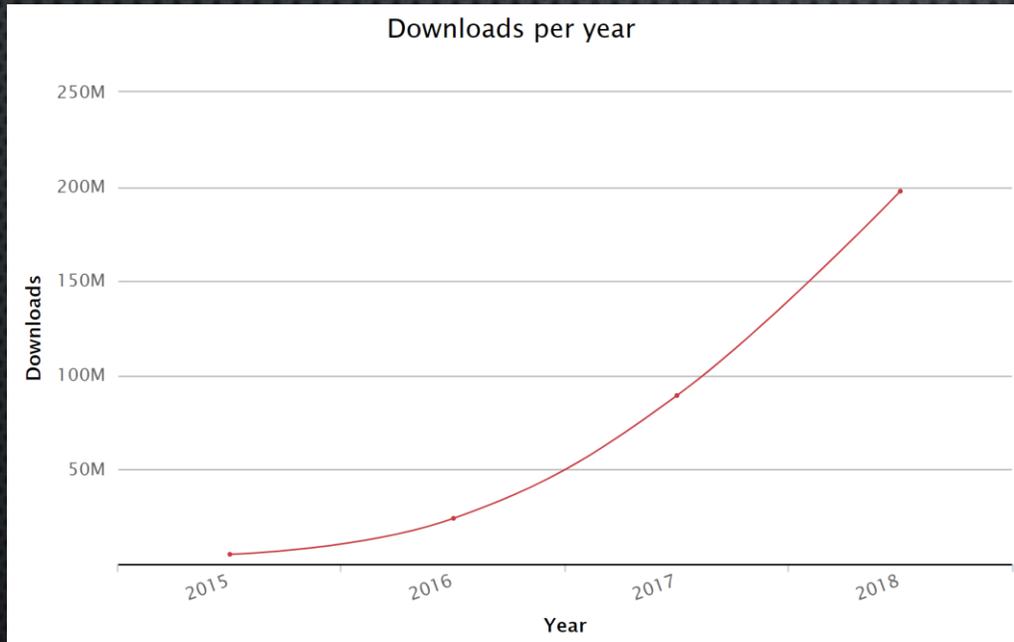

# THE PRESENT

WEBPACK STATISTICS

WEBPACK 5 IS COMING

# THE FRONT-END TOOLING SURVEY 2019

## DO YOU USE A JAVASCRIPT MODULE BUNDLER IN YOUR WORKFLOW?

Module Bundler	Number of Votes	Percentage	% Diff (to 2018)
Webpack	2,204	73.34%	+7.66%
I don't use a module bundler	440	14.64%	-5.91%
Parcel	85	2.83%	+1.79%
Rollup	62	2.06%	-0.12%
Browserify	49	1.63%	-2.09%
RequireJS	37	1.23%	-1.32%
SystemJS	3	0.10%	N/A
Other (please specify)	125	4.16%	+0.15%

# WEBPACK 5 BETA: NEW FEATURES

## PERSISTENT CACHING

SPEEDS UP BUILD STARTUP

## EXPERIMENTS

RELAX SEMVER COMPATIBILITY

TOP LEVEL AWAIT

ASSET MODULE TYPE

## YARN PNP SUPPORT

# WEBPACK 5 BETA: IMPROVEMENTS

## IMPROVED TREE SHAKING

MODULE LEVEL SYMBOL TRACKING

NAMESPACE/JSON OBJECT  
TRACKING

## RUNTIME CODE GENERATION

ES2015 CODE GENERATION

ONLY INCLUDES CODE NEEDED BY  
APPLICATION

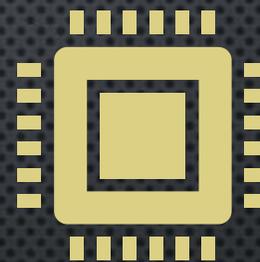

## WATCHING SEES MORE BUILD-AFFECTING CHANGES

# WEBPACK 5 BETA: CHANGES

## **NO LONGER FOCUS ON NODE.JS COMPATIBILITY**

NO NODE.JS BUILT-IN MODULE POLYFILLS

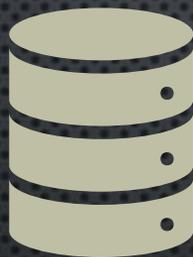

## **NEW SPECS**

JSON MODULES

(EXPERIMENT) NEW WEBASSEMBLY MODULES

# WEBPACK 5 BETA: USABILITY

## EASE OF USE FOR LONG TERM CACHING

DETERMINISTIC BY DEFAULT

## IMPROVED NAMES FOR DEBUGGING

# WEBPACK 5 BETA: EXTENSIBILITY

Support Plugins for Stats  
JSON and Text Format

Runtime Modules for  
runtime code

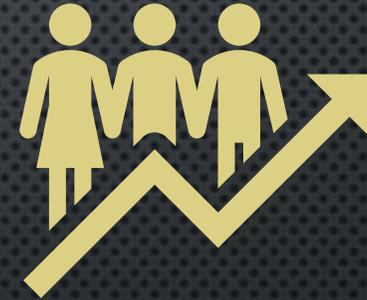

# THE FUTURE

WHERE IS WEBPACK HEADING TO?

# WEBPACK SHOULD BE

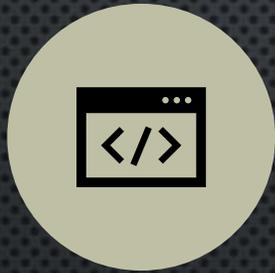

a web app optimizer

a help for development

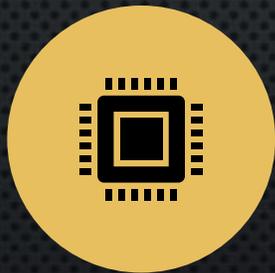

# WEBPACK SHOULD BE A WEB APP OPTIMIZER

support native web apps and optimize them

minimize webpack-specific syntax or make it optional (hint)

follow latest specs e. g. for HTML, CSS, JSON, WASM integration

Integrate with more technologies:  
WebWorker,  
ServiceWorker, Workflets

# WEBPACK SHOULD BE A HELP FOR DEVELOPMENT

safe to use,  
stable while  
using

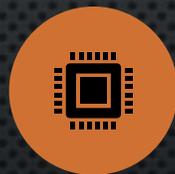

improve  
debugging  
experience

improve build  
speed,  
especially  
incremental

integrate with  
pre and post  
processors, other  
languages

allow to use new  
technologies in  
all (old) browsers

allow to adapt  
to custom needs

THANKS
